

Can of Worms

BMI: 79740984

Key: C
Composer(s): David Graybeard

A worm gnawed at my brain, no need to be alarmed
Found a dead bear on the road, and I dumped it in Central Park
Strapped a whale head to my van, and my heart was all a twitter
If it's creepy and it's dead, I gotta have that critter
Now it's time to open a whole new can of worms
I'm a little paranoid and a bit berserk
And I'm right where, I can do my worst
Helpin' to destroy government research

But I am just a part, a part of the cunning plan
To destroy what's left, what's left of the government
A worm in every brain, a whale head in every pot
That is what, I am all about

refrain

The Secretary of Ed, really loves A1
Every school should have some, and it's just begun
That got me thinking, that if you spread it 'round
It could even be, a medical compound

refrain

And best of all, I can plainly see
There's a horde of other crazies, just like me
Following me, on the right and left
Throughout the south, and the middle west

refrain

If you think I'm crazy, just a sad buffoon
The guy who's now my boss, is crazy as a loon
He's the tip of the iceberg, ready for the ship of state
We're heading for it now, and won't that make us great?

refrain
