How does He know, how does He know that He's right?

You say He got here well before us

And that gives Him special rights

To make us broken down and sinful

And force us to love our plight

A couple of people disobeyed Him

Now we're the ones that have to pay

And when some other folks displeased Him

He just flushed them all away

He was really big on genocide

Of people who just weren't Jews

Even sent some bears to kill some children

For doing just what children do

Once He fucked a tribal virgin

Without asking her permission

Then His Son was hung and tortured

According to His own wishes

The weekend he was tortured

Now makes everything okay

If only we believe

What these crazy stories say

Well I ain't sick, and I ain't broken

Ain't guilty for things long past

I ain't sinful and I ain't hopin'

For anything from that Royal Ass
