Embrace your lover in this moment
Take the hand of your best friend
The warmth within and between us
Will grow cold, in the end (3x)

instrumental over first two lines of verse

Taste the freedom that surrounds you
Swallow hard and just accept
The long hard price that others have paid
For this momentary flash (3x)

Listen to the world around you
The harmony of the spheres
Every note must have an ending
The sound will fade, with the years
